

PITOT TUBE FLOWMETER

Model : BI 211P.0 ; BI 211P.2

BI 213P.0 ; BI 213P.2

PITOT TUBE DULY CERTIFIED/CALIBRATED FROM IIT AVAILABLE

The BI 211P.0 and BI 211P.2 BI 213P.0 and BI 213P.2 are portable micro-manometers using Pitot tubes and a large LCD display. They are used to perform measurements in the fields of air conditioning, heating and ventilation. They measure the differential pressure detected by a Pitot tube connected to the instrument inputs acquiring the wind speed and flow rate inside pipelines and vents. They also measure the temperature using a type K thermocouple sensor.

The BI 211P.2 and BI 213P.2 instruments are dataloggers. They memorize up to 36,000 samples which can be transferred from the instrument connected to a PC via the

multi-standard RS232C serial port and USB 2.0. The storing interval, printing, and baud rate can be configured using the menu. They are also fitted with an RS232C serial port and can transfer the acquired measurements to a PC or to a portable printer in real time.

Short feature :- Instrument is Portable type, Battery Operated, Shows Velocity, Pressure, Flow & Temp in selectable units. It can Average Flow & velocity readings. Readings recordable, To be Connected with Pitot Tube by rubber tubing. The same meter can measure Temp. of Process.
